

National Starch LLC has an excellent opportunity for a Sr. Associate, Clinical Nutrition as a member of the Nutrition team located at their corporate headquarters in Bridgewater, NJ.

National Starch is a world-leader in specialty starches and other nature-based ingredients. You may not know us by name, but you almost certainly encounter our products every day in many types of foods and beverages and a wide range of consumer products. Our customers include major players in industry, including not only the world's largest food companies but also the most creative and dynamic. Because we produce specialties, we have a continuing drive for innovation and an intimate knowledge of our markets. That means that we value creativity, technical competence, diverse thinking and an entrepreneurial spirit.

Position Overview:

The Sr. Associate , Clinical Nutrition will lead teams and projects involving experimental design, execution and commercialization for new product development for nutritional ingredients for the clinical nutrition business segment for the National Starch Food Innovation (NSFI). This will include interdisciplinary projects of global scope.

Principal responsibilities and activities:

- Develop and manage clinical ingredient program including supervision of internal matrix resources and several external labs.
- Advance the capabilities of the clinical nutrition business.
- Design and conduct experiments in the laboratory and pilot plant to progress projects.
- Communicate results and keep experiment records in required formats.

Requirements:

- PhD in Nutrition, Food Science, Biochemistry, Carbohydrate Chemistry, Chemistry, Cereal Science or related field with 5 or more years of experience in commercial development of ingredients or consumer goods, MS with 8 or more years experience.
- Demonstrated experience in hands-on product development with laboratory and/ or pilot plant equipment/processes related to nutritional ingredients or products.
- Demonstrated ability and experience to effectively lead and function within a cross-functional team.
- Clinical study experience or exposure highly desirable.
- Demonstrated track record of significant technical achievement including patents, patentability of technology, publications, presentations, and product development/ launch experience.
- Experience with patents and patentability of technology.
- Familiarity with experiment design, statistical data analysis, and interpretation of results.
- Strong project management skills and experience.
- Self-motivated and results-driven and demonstrated ability to deliver under agreed upon deadlines.
- Excellent interpersonal, verbal and written technical communication skills (e.g. making presentations and writing technical reports).
- Creative problem solver- driven for invention/ innovation.
- Demonstrated leadership and teamwork skills and experience.
- Proficiency in Microsoft Office (word, excel, power-point, project)
- Some travel required to run tests at external facilities, visit other NSFI facilities or to manage external partners.
