

## **Research Scientist - Nutritional Epidemiology**

### **The Position**

We require a mid-career research scientist with experience in the field of epidemiology to provide critical expertise to our health and sensory science capability, and to complement the clinical and translational science activities in CSIRO's Preventative Health Flagship.

Your responsibilities will include the provision of scientific and professional leadership in nutritional epidemiology to realise scientific and enterprise goals; a demonstrated commitment to research excellence; and provision of nutritional epidemiology expertise and skills to projects, guiding and enhancing their application to public health outcomes.

**Location:** Adelaide, however Sydney or Melbourne may be considered.

**Salary:** \$83K - \$112K + superannuation

**Tenure:** Permanent, full-time

**Ref. No:** 2009/904

### **To be successful in this position you will need:**

- Tertiary qualifications in a relevant field of nutritional science at PhD level, with specific experience in nutritional epidemiology;
- and a demonstrated aptitude for independent research.

### **Who we are**

CSIRO Scientific and Industrial Research Organisation is one of the largest and most diverse scientific organisations in the world. By igniting the creative spirit of our people, we deliver great science and innovative solutions that benefit industry, society and the environment.

### **Our Business Unit**

The Preventative Health Flagship is a multidisciplinary based activity focused on improving the health and wellbeing of Australians through research into prevention and early detection of common chronic diseases. For more information visit: [Preventative Health Flagship](#).
