August 2013 Media Alert: *The American Journal of Clinical Nutrition*

The following articles are being published in the August 2013 issue of *The American Journal of Clinical Nutrition* (AJCN), a publication of the American Society for Nutrition. [Full summaries and analyses are available here](#). Articles published in AJCN are embargoed until the article appears online either as in press (Articles in Press) or as a final version. The embargoes for the following articles have expired. Follow the links for full text articles.

Sugar-sweetened beverages -- should they be targeted?

Researchers continue to evaluate relation between consumption of sugar-sweetened beverages and health and whether banning sales of large serving sizes effectively benefits health.

Wang YC, Vine SM. [Caloric effect of a 16-ounce \(473-mL\) portion-size cap on sugar-sweetened beverages served in restaurants](#). *American Journal of Clinical Nutrition* 2013;98:430-5.

Ambrosini GL, Oddy WH, Huang RC, Mori TA, Beilin LJ, Jebb SA.

[Prospective associations between sugar-sweetened beverage intakes and cardiometabolic risk factors in adolescents](#). *American Journal of Clinical Nutrition* 2013;98:327-34.

Nonhuman primate studies provide key insights to elusive nutrition questions

Two independent studies utilize nonhuman primates (baboons and monkeys) to tackle important questions related to nutrition and health.

Keenan K, Bartlett TQ, Nijland M, Rodriguez JS, Nathanielsz PW, Zürcher NR. [Poor nutrition during pregnancy and lactation negatively affects neurodevelopment of the offspring: evidence from a translational primate model](#). *American Journal of Clinical Nutrition* 2013;98:396-402.

Kavanagh K, Wylie AT, Tucker KL, Hamp TJ, Gharaibeh RZ, Fodor AA, Cullen JM. [Dietary fructose induces endotoxemia and hepatic injury in calorically controlled primates](#). *American Journal of Clinical Nutrition* 2013;98:349-57.

Hansen BC. [Nonhuman primate advances in nutrition research](#). *American Journal of Clinical Nutrition* 2013;98:264-5.

Dietary protein: friend or foe in diabetes?

Controlled clinical trial finds no negative impact of higher protein intake on kidney function in overweight or obese subjects consuming weight-loss diets.

Jesudason DR, Pedersen E, Clifton PM. [Weight-loss diets in people with type 2 diabetes and renal disease: a randomized controlled trial of the effect of different dietary protein amounts](#). *American Journal of Clinical Nutrition* 2013;98:494-501.
